Subject: RE: GKM sampling location names and river miles?

Bill et al., here are some distances based on your request to Cheryl. Linda generated them from the USGS National Hydrologic Data (NHD):

San Juan River:

34.8 Miles - Farmington to Shiprock

55.1 Miles - Shiprock to Aneth

10.3 Miles - Aneth to Montezuma Creek

15.8 Miles - Montezuma Creek to Bluff

33.9 Miles - Bluff to Mexican Hat

112.9 Miles - Mexican Hatt to Confluence of the Colorado River

62.5 Miles - Confluence of the Colorado River to Glen Canyon Dam at base of Lake Powell

We have added these rivers to the bottom of the map and they are entitled NHD Rivers.

Subject: RE: GKM sampling location names and river miles?

I've attached a map. Not sure you got this already. Here is the copy of the map with the river miles between sampling sites created by Ian Bruce at Weston.

Frank will follow up with river miles between various locations on the river. I'm out of the office next week. Frank will continue look for new data services to put in the map below. Frank can be reached for support if needed at 208-699-2712 or froberts@innovateteam.com. Please cc me and Stacy Takeda.

Here is the link to the map in the Geoplatform:
<http://epa.maps.arcgis.com/home/webmap/viewer.html?webmap=1cb57e2eee624006929c3e13fe31b399>
(you all need access – except Bill– see below)

Ned, Anna, and Gerry – when and if you have a spare minute, please get access to the Geoplatform with single sign-on – instructions below. Ned and Anna – your accounts are old. Please do this to update your accounts.

Please log in to the EPA Geoplatform:

1. Go to: <https://epa.maps.arcgis.com/home/signin.html>

2. Select this option and sign in with your LAN ID and password:

3. Once you've successfully logged in, reply to this email so I can add you to the Gold King group for access to the maps.

Thanks,

Cheryl

Subject: RE: GKM - R09 - Prelim Surface Water (8/10 and 8/11)

Adding insult, senior management here would like to know the place names and river miles of the sample locations. I can guess at some but not all of the place names. River miles can be 0 at Gold King or 0 at SJLP. Let me know if this isn't easy to supply; I'll see if Cheryl Henley has any ideas.

I don't know how data gets into the spreadsheet so this request may be inconvenient (if so ignore), but it would be nice to have the data columns arranged left to right - upstream (SJLP) to downstream (SJMh or even SJPF). If too much trouble I can just move columns around on my version...

Yes, thanks very much for sending this on. I don't see any samples from SJPF. Did/will it get sampled?

Cheers,

Ned

Early look.

Still needs validation.

Hi Randy!

Here's a preliminary dataset for surface water samples collected August 10th and August 11th.

We've got the validated data on its way.
